OBJECTIVE

Experienced Software Developer and with a strong focus on innovation and technology. Proficient in multiple programming languages such as JavaScript, PHP and React Native. Committed to creating impactful solutions, staying current with industry trend.

SKILLS & ABILITIES

JavaScript

React Native

MongoDB

Documentation

Technical Writing

Teamwork

Communication and Collaboration

UI/UX

Version Control

Performance Optimization

EXPERIENCE

May-Aug 2024	**Frontend Developer Intern**
	Swahili Pot Hub

- Design: Re-designed the company's website so that it can look better than the early version

- Developer Outreach: built relationships with key developers, influencers, and community leaders to expand the community' reach

- Community Events: participated in developer-focused even hackathons, workshops, and webinars.

These were both physical and virtual

- Content Creation: Produced technical blog posts, videos, Community Engagement Actively engaged with developers various channels, such as Twitter spaces, Slack, conferences and physical meetups,

July -September 2024 **Frontend Developer, Mobile App developer Intern**
HNG

- Frontend Development: building and maintaining user-facing features using HTML, CSS, and JavaScript. This includes ensuring responsiveness, accessibility, and cross-browser compatibility of the web applications.

- Collaboration: collaborate closely with designers, backend developers, and other team members to integrate user-facing elements with server-side logic. This involves understanding APIs and how to interact with backend services.

- Testing and Debugging: Writing unit tests and performing debugging to ensure the quality and reliability of frontend code.

- Learning New Technologies: Keeping up with industry trends and learning new technologies and frameworks that are relevant to frontend development (React).

- Code Reviews and Feedback: Participating in code reviews and providing constructive feedback to peers to improve code quality.

- Documentation: Documenting technical specifications, API references, and any other relevant documentation as needed.

- Continuous Improvement: Actively seeking opportunities to improve skills and knowledge through workshops, courses, and self-study.

- Communication: Effective communication skills are crucial, both for discussing technical aspects with team members and for presenting your work to stakeholders.
